### PROJECTS

#### ONLINE FOOD ORDERING SYSTEM

Created an online system that enables the customers to register, read E-menu cards of different restaurants, and order food from multiple restaurants available in different cities at the same time. This system also allows restaurant managers to register and manage their E-menus whenever needed. Various functionalities like ratings, reviews, feedback, complaints, notifications, searching, filtering, etc. have also been added.

TECHNOLOGY: PYTHON

WEB TECHNOLOGIES: HTML, JAVASCRIPT, CSS
